

'Omni Z-Wave Interface' Kit for the Leviton Range of Controllers

LIGHTING CONTROL

Ideal for lighting control especially in retrofit environments where running new cabling is not possible or too costly. 2 or 3 wire solutions. Dimming and on/off capability.

APPLIANCE CONTROL

Suitable for appliances such as table lamps and outdoor garden lighting by simply adding a Z-Wave appliance plug.

DOOR LOCKS

Easily lock and unlock a Z-Wave door locks from anywhere in the world using your preferred interface.

TWO WAY FEEDBACK

The Omni Z-Wave Interface provides two way feedback updating all your Leviton interfaces instantly*.

Z-WAVE FREQUENCY

The Interface will operate on Vera controllers available in the AUS/NZ Z-Wave frequency.

FM Hometech releases an Australia and New Zealand "Omni Z-Wave Interface" Kit for the Leviton Range of Automation Controllers.

The 'Omni Z-Wave Interface'™ Kit is an exciting new solution that allows control and two way feedback from the Leviton range of controllers of Z-Wave® modules for the 240v 50Hz market. This includes lighting modules, appliance plugs, blind controllers and door locks*.

The status is updated instantly on interfaces such as SnapLink Mobile and OmniTouch 7**.

This Kit opens up new opportunities for lighting, appliance & automation control in Australia and Zealand where Z-Wave and Leviton integration has not previously been

possible. One of the most significant benefits is for the 240v 50Hz retro-fit market.

Combined with the power of the automation programming features of PC Access, the possibilities are endless.

Scan the QR Code or click on the banner below to find out more, purchase a Kit or to download the installation manual.

* Not all Z Wave products are able to be controlled.

** The Omni Z-Wave Interface Kit requires an Activation Key (included as part of the Kit) before it will provide any control or feedback.
