DORANI®

Wi-Fi App Connection Guide

Step 1 :

Download the **2-Easy** APP

Please See Dorani Touch Installation Manual for Wiring and Installation

The Monitor MUST be installed in a location with GOOD Wi-Fi signal

Low Wi-Fi signal can cause poor or unstable connections.

Locate the monitor as close to the Wi-Fi router/modem as possible

A Speed of 1.5Mbps UPLOAD is recommended AT THE MONITOR,

lower speeds may affect quality and reliability.
THE MONITOR WILL TAKE APPROXIMATELY 1 MINUTE TO POWER UP

App Store   Google Play

Step 2 – Connect to the local Wi-Fi / Internet (ON THE MONITOR)

1 - Tap the Screen to reveal ALL Icons as below

PC   Wi-Fi
Symbols

These symbols will appear after you have completed these steps

1) Select Settings
2) Select 'WIRELESS' from the sub menu
3) Enter Password **30613061**
4) Select ' Wi-fi Switch' to turn on
5) Read and accept the T&C's
6) Select 'Wlan Setting'
7) Choose your Wi-Fi Network
8) Select 'PWD' and enter your Wi-Fi password
9) Make sure Auto Connect is ticked
10) Press connect button

The System will now connect to your Wi-Fi, this will appear at the bottom of the screen. Use the arrows to return to the home screen, a Tick should also appear next to the PC Symbol at the bottom of the screen next to the
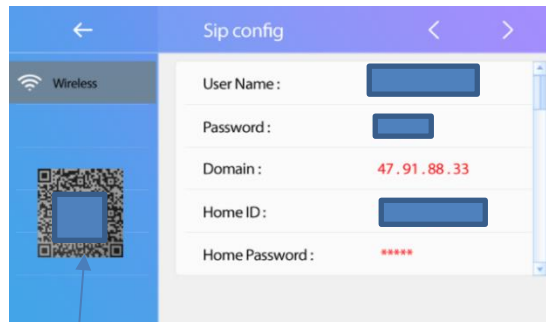

Step 3 – Mobile APP connection (ON YOUR PHONE OR TABLET)
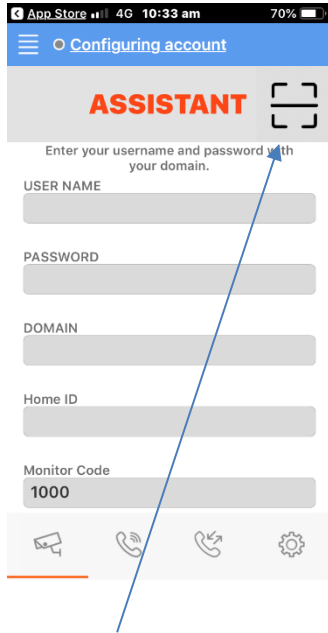

1 : Open the APP   **2 :** Open Wireless settings on the monitor   **3:** Confirm
Press the **PC** button (see step 2 picture)

Scan the QR code on the screen with

your phone.

IOS - Save

Press the **'scan'** button.   Android – scroll to bottom of screen and **SAVE**   Device should now be registered

You can access the assistant by pressing the **MENU button 4 lines top right of screen) followed by **Assistant****

Step 4 – Testing - Setting Divert

The system has 3 different mode operations

1) Normal = No Diversion to Mobile Device
2) Divert if Not Answered = Divert after time (default 20 Seconds)
3) Divert Always =Divert to phone (5 second delay)
4) Divert and ring monitor simultaneously (5 second delay)
   - From the Menu, select Settings, select General
     Press the arrow > up the top right
     Change 'Screen on in divert' to [Enable]. The intercom will now display on the monitor while initiating a call to your device

Select Call Scene and Desired Function

Once diversion is set – Place a call to test diversion function

Divert Time – When set for Divert if not answered (currently 20 Seconds) the time can be adjusted before diversion starts

- **This intercom can work as a stand-alone intercom, no requirements for WI-FI or mobile app services**
- **Speeds greater than 1.2Mbps upload are recommended at the monitor for reliability and quality**
- **Many ISP's restrict activity within supplied routers/modems. An IT specialist may be required to 'unlock' these restrictions. This may fall outside standard installation and Dorani technical support as it is as third-party device**
- **Dorani bears no responsibility for connection problems caused by 3rd party equipment such as modems, routers and mobile devices**
- **Warranty does not apply is the connection issues are 3rd party related**
